The above statement of cash flows should be read in conjunction with the accompanying notes.

CHRISTIAN SUPER

**Notes to the Financial Statements
For the year ended 30 June 2021**

1. Operation of the Fund

Christian Super (the "Fund") operates for the benefit of employees of schools affiliated with Christian Schools Australia Limited and Christian Education National Limited, of churches and other ministries affiliated with the Baptist Union of Australia, the Churches of Christ NSW and Australian Christian Churches, and of other Christian ministry organisations. Subsequent to obtaining public offer status on 1 April 2006, the Fund accepts contributions from a range of employers.

The Trustee (Christian Super Pty Limited) elected for the Fund to become a regulated Fund in accordance with the Superannuation Industry (Supervision) Act 1993 legislation with effect from 1 July 1994, and intends at all times to operate the Fund in accordance with the requirements of the legislation. In accordance with amendments to the Superannuation Industry (Supervision) Act 1993 the Fund was registered with the Australian Prudential Regulation Authority on 14 February 2006 (registration no R1004137).

Administration of the Fund is conducted by Australian Administration Services.

The Fund is incorporated and domiciled in Australia and the principal place of business of the Fund is:
1A, Rhodes Corporate Park
Homebush Bay Drive
Rhodes, NSW 2138

2. Summary of significant accounting policies

2.1 Basis of preparation

The financial statements are a general purpose financial report which have been prepared in accordance with Australian Accounting Standards, and other authoritative pronouncements of the Australian Accounting Standards Board, the Superannuation Industry (Supervision) Act 1993 and regulations and the provisions of the Trust Deed.

The financial statements are presented in Australian dollars.

The Fund presents its statement of financial position in order of liquidity.

The Fund is a not-for-profit entity for the purpose of preparing financial statements.

The financial statements were approved by the Board of Directors of the Trustee, Christian Super Pty Limited on 23rd September 2021.

2.2 New accounting standards and interpretations

Accounting standards and interpretations effective for the current financial year

For the first time the Fund applied certain standards and amendments which are effective for annual periods beginning on or after 1 July 2020. The adoption of these standards and amendments has not had any significant financial impact on the financial statements.

Amendments to IFRS 16 Covid-19 Related Rent Concessions

On 28 May 2020, the IASB issued Covid-19-Related Rent Concessions - amendment to IFRS 16 Leases. The amendments provide relief to lessees from applying IFRS 16 guidance on lease modification accounting for rent concessions arising as a direct consequence of the COVID-19 pandemic. As a practical expedient, a lessee may elect not to assess whether a COVID-19 related rent concession from a lessor is a lease modification. A lessee that makes this election accounts for any change in lease payments resulting from the COVID-19 related rent concession the same way it would account for the change under IFRS 16, if the change were not a lease modification.

This amendment had no impact on the Fund's financial statements as it did not receive COVID-19 related rent concessions during the reporting period.

Amendments to IAS 1 and IAS 8 Definition of Material

The amendments provide a new definition of material that states, "information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity." The amendments clarify that materiality will depend on the nature or magnitude of information, either individually or in combination with other information, in the context of the financial statements. A misstatement of information is material if it could reasonably be expected to influence decisions made by the primary users.

This amendment had no impact on the Fund's financial statements.

There are no other standards, interpretations or amendments to existing standards that are effective for the first time for the financial year beginning 1 July 2020 that had a material impact on the Fund.

2. Summary of significant accounting policies (continued)

2.2 New accounting standards and interpretations (continued)

Accounting standards and interpretations issued but not yet effective

The fund has not early adopted any other standards, interpretations or amendments that have been issued but are not yet effective.

Accounting Standard and Nature	Application Date of Standard	Application Date of Fund
<p>AASB 2020-1 Amendments to Australian Accounting Standards – Classification of Liabilities as Current or Non-current</p> <p>This Standard amends AASB 101 to clarify the requirements for classifying liabilities as current or non-current. Specifically:</p> <ul style="list-style-type: none"> - the conditions which exist at the end of the reporting period are those which will be used to determine if a right to defer settlement of a liability exists; and - management’s intention or expectation does not affect classification of liabilities. 	1 Jan 2022	1 Jul 2022

The impact of the adoption of AASB 2020-1 is not material to the Fund.

2.3 Significant accounting policies

The significant accounting policies have been consistently applied in the current financial year and the comparative period, unless otherwise stated. Where necessary, comparative information has been re-presented to be consistent with current period disclosures.

(a) Consolidation

The Fund is an investment entity and, as such, does not consolidate the entities it controls. Instead, interests in subsidiaries are classified as fair value through profit or loss and measured at fair value.

For further details refer to Note 2(l).

(b) Financial assets and liabilities

(i) Classification

The Fund classifies its financial assets and financial liabilities into the categories discussed below in accordance with AASB 9. In applying that classification, a financial asset or financial liability is considered to be held for trading if:

- It is acquired or incurred principally for the purpose of selling or repurchasing it in the near term; or
- On initial recognition, it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking; or
- It is a derivative (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument).

Financial assets

Financial assets measured at Fair Value through Profit and Loss (FVPL).

A financial asset is measured at FVPL if:

- Its contractual terms do not give rise to cash flows on specified dates that are solely payments of principal and interest (SPPI) on the principal amount outstanding; or
- It is not held within a business model whose objective is either to collect contractual cash flows, or to both collect contractual cash flows and sell; or

2. Summary of significant accounting policies (continued)

(b) Financial assets and liabilities (continued)

- At initial recognition, it is irrevocably designated as measured at FVPL when doing so eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise from measuring assets or liabilities or recognising the gains and losses on them on different bases.

The Fund includes in this category:

- Financial instruments held for trading: this includes all instruments which are acquired principally for the purpose of generating a profit from short-term fluctuations in price. This category also includes derivative contracts in an asset position.
- Receivables: this includes short-term receivables.

Financial liabilities

Financial liabilities measured at FVPL.

A financial liability is measured at FVPL if it meets the definition of held for trading.

The Fund includes in this category derivative contracts in a liability position.

(ii) Recognition

The Fund recognises a financial asset or financial liability when, and only when, it becomes a party to the contractual provisions of the instrument.

Purchases or sales of financial assets that require delivery of assets within the timeframe generally established by regulation or convention in the marketplace regular way trades are recognised on the trade date, i.e., the date that the Fund commits to purchase or sell the asset.

(iii) Derecognition

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised where:

- The rights to receive cash flows from the asset have expired; or
- The Fund has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows full without material delay to a third party under a 'pass-through' arrangement; and
- Either (a) the Fund has transferred substantially all the risks and rewards of the asset, or (b) the Fund has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

The Fund derecognises a financial liability when the obligation under the liability is discharged, cancelled or expires.

(iv) Initial measurement

Financial assets and financial liabilities at fair value through profit or loss are recorded in the statement of financial position at fair value. All transaction costs for such instruments are recognised directly in the income statement.

Receivables and financial liabilities (other than those classified at fair value through profit or loss) are measured initially at their fair value plus any directly attributable incremental costs of acquisition or issue.

For financial assets and liabilities where the fair value at initial recognition does not equal the transaction price, the Fund recognises the difference in the income statement, unless specified otherwise.

(v) Subsequent measurement

After initial measurement, the Fund measures financial instruments at fair value through profit or loss. Subsequent changes in the fair value of those instruments are recorded as 'changes in assets measured at fair value' through the income statement. Interest and dividends earned are recorded separately in 'Interest revenue' and 'dividend revenue' in the income statement.

(c) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

2. Summary of significant accounting policies (continued)

(c) Fair value measurement (continued)

The principal or the most advantageous market must be accessible by the Fund.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

The Fund uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy.

(d) Cash and cash equivalents

Cash and cash equivalents in the statement of financial position comprise cash at bank and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purposes of the statement of cash flows, cash and cash equivalents consist of cash at bank which represents the operational bank account held by the Fund.

(e) Receivables and payables

Receivables and payables are carried at nominal amounts due and payable which approximate fair value. Receivables and payables are normally settled on 30 day terms. Payables represent liabilities for goods and services provided to the Fund prior to the end of the financial year that are unpaid at year-end.

(f) Revenue recognition

The specific recognition criteria described below must be met before revenue is recognised:

Changes in assets measured at fair value

Changes in the fair value of financial instruments are calculated as the difference between the fair value at sale, or at balance date, and the fair value at the previous valuation point. All changes are recognised in the income statement.

Interest

Interest revenue on cash and other financial assets carried at fair value is recorded according to the terms of the contract and is recognised in the income statement.

Dividends and distributions

Dividend and distribution revenue is recognised when the Fund's right to receive payment is established. Revenue is presented gross of any non-recoverable withholding taxes, which are disclosed separately as a tax expense in the income statement.

(g) Income tax

The Fund is a complying superannuation fund for the purposes of the provisions of the Income Tax Assessment Act 1997. Accordingly, the concessional tax rate of 15% has been applied to the Fund's taxable income.

Income tax in the income statement for the year comprises current and deferred tax.

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the reporting date.

Deferred tax is provided on all temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognised for all taxable temporary differences except:

- Where the deferred tax liability arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- When the taxable temporary difference is associated with investments in subsidiaries, associates or interests in joint ventures, and the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

2. Summary of significant accounting policies (continued)

(g) Income tax (continued)

Deferred tax assets are recognised for all deductible temporary differences, carry-forward of unused tax assets and unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry-forward of unused tax assets and unused tax losses can be utilised, except:

- Where the deferred tax asset relating to the deductible temporary differences arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor the taxable profit or loss.
- In respect of deductible temporary differences associated with investments in subsidiaries, associates or interests in joint ventures, in which case a deferred tax asset is only recognised to the extent that it is probable that the temporary difference will reverse in the foreseeable future and taxable profit will be available against which the temporary difference can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised.

Unrecognised deferred tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax assets and deferred tax liabilities are offset only if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and liabilities relate to the same taxable entity and the same taxation authority.

(h) Goods and services tax ("GST")

Revenues, expenses and assets are recognised net of the amount of GST, except:

- When the GST incurred on a sale or purchase of assets or services is not payable to or recoverable from the taxation authority, in which case the GST is recognised as part of the revenue or the expense item or as part of the cost of acquisition of the asset, as applicable; or
- When receivables and payables are stated with the amount of GST included.

The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the statement of financial position. Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the taxation authority.

Cash flows are included in the statement of cash flows on a gross basis. The GST component of cash flows arising from investing activities, which is recoverable from, or payable to the taxation authority are classified as operating cash flows.

(i) Foreign currency

The functional and presentation currency of the Fund is Australian Dollars, which is the currency of the primary economic environment in which it operates. The Fund's performance is evaluated and its liquidity managed in Australian Dollars. Therefore, the Australian Dollar is considered as the currency that most faithfully represents the economic effects of the underlying transactions, events and conditions.

Transactions in foreign currencies are initially recorded at the functional currency spot rate at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency spot rates of exchange at the reporting date.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in a previous financial report, are recognised in the income statement in the period in which they arise.

Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

(j) Member liabilities

Member liabilities are measured at the amount of accrued benefits. Defined contribution member liabilities are measured as the amount of member account balances as at the reporting date.

2. Summary of significant accounting policies (continued)

(k) Reserves

The Trustee maintains an operational risk reserve, insurance reserve, administration reserve and investment and taxation reserve to provide the Trustee with access to funds to protect members' interests and mitigate the impact of an adverse event. All reserves are operated in accordance with the Fund's Reserve Policy and are held at a Fund level.

(l) Significant accounting judgements and estimates and assumptions

The preparation of the Fund's financial statements requires management to make judgements, estimates and assumptions that affect the amounts recognised in the financial statements. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in the future.

The Trustee has considered the impact of COVID-19 and other market volatility in preparing its financial statements. Given the dynamic and evolving nature of COVID-19 as well as limited recent experience of the economic and financial impacts of such a pandemic, changes to the estimates and outcomes that have been applied in the measurement of the Fund's assets and liabilities may rise in the future.

Fair value of Investments

When the fair values of the investments recorded in the statement of financial position cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques. The inputs in these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required to establish fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility.

Changes in assumptions about these factors could affect the reported fair value of these investments.

For property and infrastructure assets held within trusts by the Fund, significant valuation uncertainty clauses have been incorporated into external valuation reports adopted for the NAV of these trusts as at 30 June 2021. This is consistent with global industry practice. This uncertainty does not mean the valuations adopted cannot be relied upon; however the clauses indicate the higher degree of valuer judgment in determining significant valuation assumptions.

As a result, the Fund has exercised a significantly higher degree of judgment in measuring the fair value of its unlisted investments as at 30 June 2021.

Assessment as investment entity

Entities that meet the definition of an investment entity within AASB 10 are required to measure their subsidiaries at fair value through profit or loss rather than consolidate them. The criteria which define an investment entity are, as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

The Fund's product disclosure statement details its objective of providing services to members which includes investing in accordance with Biblical principles to ensure that member funds are managed responsibly while growing for their future needs.

The Fund reports to its members via an annual report, and to its management, via internal management reports, on a fair value basis. All investments are reported at fair value to the extent allowed by AASB 1056 in the Fund's annual report. The Fund has considered an appropriate exit strategy for all of its investments.

The Trustee has also concluded that the Fund meets the additional characteristics of an investment entity, in that it has more than one investment; the investments are predominantly in the form of equities and similar securities; it has more than one investor and its investors are not related parties.

The Trustee has therefore concluded that the Fund meets the definition of an investment entity. These conclusions will be reassessed on an annual basis, if any of these criteria or characteristics change.

Refer to Note 19 for a list of the Fund's subsidiary.

2. Summary of significant accounting policies (continued)

(m) Property, plant and equipment

Property, plant and equipment are stated at historical cost less accumulated depreciation and any accumulated impairment losses.

(n) Leases

Leases are recognised, measured and presented in line with AASB 16 Leases.

Valuation of right-of-use assets and lease liabilities

The application of AASB 16 requires the Fund to make judgements that affect the valuation of right-of-use assets (refer Note 6) and the valuation of lease liabilities (refer Note 7). These include determining contracts within the scope of AASB 16, determining the contract terms and determining the interest rate used for discounting of future cash flows.

The lease terms determined by the Fund comprises non-cancellable period of lease contracts, periods covered by an option to extend the lease if the Fund is reasonably certain to exercise that option and periods covered by an option to terminate the lease if the Fund is reasonably certain not to exercise that option. The lease terms are applied to determine the depreciation rate of right-of-use assets.

For leases with terms not exceeding twelve months and for leases of low-value assets (less than \$5,000), the Fund has exercised the optional exemptions. The lease payments under these contracts are recognised on a straight-line basis over the lease term as other operating expenses.

In all other leases in which the Fund acts as the lessee, the present value of future lease payments is recognised as a financial liability.

Correspondingly, the right-of-use asset is recognised within property, plant and equipment at the present value of the lease liability.

The right-of-use asset is depreciated on a straight-line basis over the lease term or, if shorter the useful life of the leased asset. These are held at fair value, the proxy for which is cost less accumulated amortisation.

The lease liability is valued by summing all future lease payments applicable until the expiry of the lease and then calculating their present value using the applicable discounted rate.

3. Member liabilities

Member account balances are determined by unit prices that are determined based on the underlying investment movements.

Members bear the investment risk relating to the underlying assets and unit prices used to measure the member liabilities. Unit prices are updated weekly.

At 30 June 2021 \$816,882 (2020: \$219,341) has not been allocated to members at reporting date. The amount not yet allocated to members' accounts consists of contributions received by the Fund that have not been able to be allocated to members at reporting date less contribution tax on these unallocated contributions.

Refer to Note 17 for the Fund's management of the investment risks.

Members liabilities vest 100% to members.	2021	2020
	\$	\$
Members liability at end of the financial year	<u>1,974,455,746</u>	<u>1,643,738,972</u>
As compared to net assets available for member benefits	<u>1,994,093,777</u>	<u>1,656,306,675</u>

4. Fair value of financial instruments

(a) Classification of financial instruments under the fair value hierarchy

AASB 13 requires disclosures relating to fair value measurements using a three-level fair value hierarchy. The level within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement. Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability. The following table shows financial instruments recognised at fair value, categorised between those whose fair value is based on:

- Level 1 : Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 : Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 : Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Valuation technique

Other interest bearing securities

The Fund invests in debt securities, term loans, corporate and government bonds. These investments have been classified as Level 1 and 2 as the significant inputs are observable such as closing prices on the last day of business of the reporting period which reflect recently transacted transactions. Other interest bearing securities are valued at the market closing price on the last day of business of the reporting period and include accrued interest.

The fair values of investments in asset-backed securities and mortgage backed securities have been classified as Level 1 and 2 as they have observable inputs regarding current rates of interest.

4. Fair value of financial instruments (continued)

(a) Classification of financial instruments under the fair value hierarchy (continued)

Listed equities

When fair values of publicly traded equity securities are based on quoted market prices, or binding dealer price quotations, in an active market for identical assets without any adjustments, the instruments are included within Level 1 of the hierarchy. The Fund values these investments at bid price for long positions and ask price for short positions.

Units in unit trusts

The Fund classifies unit trusts as Level 1 depending on whether there is a price quoted in an active market. The Fund classifies other unit trusts which are not quoted in an active market and which may be subject to restrictions on redemptions such as lock up periods, redemption gates and side pockets as either Level 2 or Level 3. The Fund considers the valuation techniques and inputs used in valuing these trusts as part of its due diligence prior to investing, to ensure they are reasonable and appropriate and therefore the net asset value ("NAV") of these trusts may be used as an input into measuring their fair value. The valuation of these trusts between Level 2 or Level 3 depends upon whether the inputs are observable or not.

Derivative assets and liabilities

The Fund uses widely recognised valuation models for determining fair values of interest rate swaps, credit default swaps, futures, options, forward foreign exchange contracts and repurchase agreements. The most frequently applied valuation techniques include forward pricing and swap models, using present value calculations. Futures are classified as Level 1, while options are classified as both Level 1 and 2. For swaps, forward foreign exchange contracts and repurchase agreements, the significant inputs into models are market observable and these financial instruments are classified as Level 2.

Valuation process for Level 3 valuations

Valuations are the responsibility of the Trustee.

The investment committee, which is a sub-committee of the Trustee Board and reports directly to the Trustee, is responsible for the management of the Fund's financial instruments. The Trustee has an internal investment team and also uses asset consultants to advise on investment issues, including asset allocation, portfolio construction and manager selection and implementation.

The Fund's overall market positions are monitored via the investment custodian and the Investment Compliance and Operational Risk report. This quarterly report uses the best available information from the custodian and the investment managers at the point in time and will use observable methods (i.e. fair value) where available.

Given recent market volatility, the Trustee reviewed the appropriateness of the inputs to its valuations. The impact of changes in valuation inputs has also been considered in terms of the classification of exposures in the fair value hierarchy, transfers within the fair value hierarchy and the level 3 sensitivity analysis. The determination of the investments' carrying value included a consideration of the impact of COVID-19.

For financial instruments classified in Level 3 in the fair value hierarchy some of the inputs to the valuation models are unobservable and therefore subjective in nature. The use of reasonably possible alternative assumptions could produce a different fair value measurement. The use of reasonably possible alternative assumptions could produce a different fair value measurement.

Quantitative information of significant unobservable inputs - Level 3:

Description	Level 3 \$	Valuation technique	Significant unobservable inputs
Australian equities	2021: \$21,524,893 2020: \$5,848,785	The latest transaction price, with adjustments made to the ordinary share price to reflect differences in liquidity structure between ordinary and preference shares.	The transaction price on the preference shares.
International equities	2021: \$301,765 2020: \$98,799	Last traded price	Last traded price
Units in unit trusts	2021: \$387,678,873 2020: \$313,799,195	Discounted cashflow valuation Net assets value based on value of underlying property or investments	Revenue multiple Market (EBITDA) Discount rate

4. Fair value of financial instruments (continued)

(a) Classification of financial instruments under the fair value hierarchy (continued)

Sensitivity analysis to significant changes in unobservable inputs within Level 3 hierarchy:

Description	Input	Sensitivity used	Effect on fair value \$
Australian equities	The transaction price on the preference shares.	+ / - 5%	2021: 1,076,245 / (1,076,245) 2020: 292,439 / (292,439)
International equities	Last traded price	+ / - 5%	2021: 15,088 / (15,088) 2020: 4,940 / (4,940)
Units in unit trusts	Revenue multiple	+/- 5%	2021: 707,208 / (707,208) 2020: 771,150 / (771,150)
	Market (EBITDA)	+/- 5%	2021: 8,638,929 / (8,638,929) 2020: 6,737,594 / (6,737,594)
	Discount rate	+/- 5%	2021: 9,543,238 / (9,543,238) 2020: 7,818,564 / (7,818,564)

If the impact of using those alternative assumptions would cause the fair value of Level 3 assets to be higher or lower by 5% of the net assets of the Fund then the result for the year would have been higher or lower by \$1,076,245 (2020: \$292,439) for Australian equities, by \$15,088 (2020: \$4,940) for International equities and by \$19,230,304 (2020: \$15,689,960) for units in unit trusts.

(b) Level 3 reconciliation

The following table shows a reconciliation of the movement in the fair value of financial instruments categorised within Level 3 between the beginning and the end of the reporting period.

30 June 2021	Australian equities \$	International equities \$	Units in unit trusts \$	TOTAL \$
Opening balance	5,848,785	98,799	313,799,195	319,746,779
Total realised/unrealised gains and losses through income statement	103,199	95,921	23,294,676	23,493,796
Purchases/Applications	15,572,908	107,045	50,585,002	66,264,956
Closing Balance	21,524,893	301,765	387,678,873	409,505,530
30 June 2020	Australian equities \$	International equities \$	Units in unit trusts \$	TOTAL \$
Opening balance	1,570,000	-	66,599,388	68,169,388
Total realised/unrealised gains and losses through income statement	-	-	(3,976,774)	(3,976,774)
Purchases/Applications	1,500,000	-	54,937,362	56,437,362
Transfers into / (out of) Level 3	2,778,785	98,799	196,239,219	199,116,803
Closing Balance	5,848,785	98,799	313,799,195	319,746,779

(c) Transfers between hierarchy levels

The Fund transfers between levels of the fair value hierarchy when there is a change in the observability of the pricing inputs or a change to valuation methodology. Transfers to/from other categories are due to changes in the market observability of inputs used in the valuation of financial instruments.

At the end of the financial year the following unlisted unit trusts changed classifications:

- CITIGROUP Inc SR Unsecured 10/23 Var changed from level 2 to level 1
- DBSGroup Holdings Ltd Subordinated Refs 03/28 Car changed from level 2 to level 1
- Visionfund International SR Unsecured 11/24 5 changed from level 2 to level 1
- Westpac 11am for Deam Pre Select changed from level 1 to level 2
- Credit Union Au Ltd SR Unsecured 09/21 Var changed from level 1 to level 2

CHRISTIAN SUPER
Notes to the Financial Statements
For the year ended 30 June 2021

5. Receivables

	2021	2020
	\$	\$
GST receivable	118,614	159,884
Prepayments	285,013	278,279
Sundry receivables	82,500	21,933
	<u>486,127</u>	<u>460,096</u>

The receivables are short-term in nature and their carrying value is assumed to approximate their fair value.

The maximum exposure to credit risk is the fair value of receivables. Information regarding credit risk exposure is set out in Note 17.

6. Property, plant and equipment

	2021	2020
	\$	\$
Property, plant and equipment		
Cost	700,412	633,930
Accumulated depreciation	(470,926)	(296,992)
Net written down value	<u>229,486</u>	<u>336,938</u>
Right of use assets		
Cost	1,066,624	1,066,624
Accumulated depreciation	(551,184)	(275,303)
Net written down value	<u>515,440</u>	<u>791,321</u>
Total net written down value	<u>744,926</u>	<u>1,128,259</u>

7. Payables

	2021	2020
	\$	\$
Due within 12 months		
Insurance premium payable	492,349	470,483
Trade and other creditors	6,326,610	3,755,517
Accrued expenses	582,685	631,038
	<u>7,401,644</u>	<u>4,857,038</u>
Lease liability		
Less than one year	270,218	274,671
More than one year	248,085	518,304
	<u>518,303</u>	<u>792,975</u>
Total payables	<u>7,919,947</u>	<u>5,650,013</u>

Due to the short-term nature of these payables, their carrying value is assumed to approximate their fair value.

The present value of the lease liability is determined using the discount rate representing the weighted average incremental borrowing rate. The weighted average incremental borrowing rate for the leased liabilities recognised as of **1 July 2021 was 3.25% p.a.** (1 July 2020 was 3.25% p.a.)

The value of interest charged on leased liabilities for the year was \$13,317 (2020: \$4,113)

Information regarding interest rate, foreign exchange and liquidity risk exposure is set out in Note 17.

8. Changes in assets measured at fair value

	2021	2020
	\$	\$
Investments held at reporting date		
Cash and short term deposits	47,765	(3,097,338)
Other interest bearing securities	268,464	(1,654,806)
Australian equities	79,993,025	(27,247,953)
International equities	73,152,420	13,367,685
Units in unit trusts	474,868	(17,839,557)
Derivatives	7,484,222	8,730,224
Total unrealised gains	<u>161,420,764</u>	<u>(27,741,745)</u>

CHRISTIAN SUPER
Notes to the Financial Statements
For the year ended 30 June 2021

8. Changes in assets measured at fair value (continued)

	2021	2020
	\$	\$
Investments realised during the year		
Cash and short term deposits	(26,855)	(132,687)
Other interest bearing securities	1,075,923	(71,257)
Australian equities	21,886,933	(4,839,971)
International equities	34,289,332	(3,117,871)
Units in unit trusts	9,249,776	13,521,185
Derivatives	52,521,209	(25,224,838)
Total realised gains	118,996,318	(19,865,439)
Changes in assets measured at fair value	280,417,082	(47,607,184)

The amounts recorded as 'realised gains/(losses)' above is the difference between the fair value at sale and the carrying amount at the beginning of the reporting period or when acquired, if acquired during the year.

9. Funding arrangements

During the year ended 30 June 2021, the employers contributed to the Fund on behalf of members as part of the Trust Deed, Award and Superannuation Guarantee Charge of 9.50%, (2020: 9.50%). Member and additional employer contributions are paid to the Fund at a rate determined by the member and/or employer.

10. Reserves

	2021	2020
	\$	\$
Administration reserve	3,124,646	3,700,301
Investment and taxation reserve	9,790,741	2,534,081
Operational risk reserve	4,818,853	4,007,186
Insurance reserve	1,903,791	2,326,135
	19,638,031	12,567,703

The Fund maintains an operational risk reserve, in accordance with the requirements established by the Australian Prudential Regulatory Authority under Prudential Standard SPS 114 Operational Risk Financial Requirement, and also holds administration, investment and taxation and insurance reserves.

The purpose of the operational risk reserve is to provide protection to the Fund in the event that a loss is incurred from an operational risk event occurring. The use of the Operational risk reserve is governed by the requirements of SPS 114, which is applicable to all APRA-regulated funds.

The Trustee holds an administration reserve of \$3,124,646 (2020:\$3,700,301) in order to assist the Trustee in meeting obligations contained in its Adequacy of Resources policies as well as an Operational risk reserve of \$4,818,853 (2020:\$4,007,186) to ensure adequate resourcing to overcome any operational risks that might eventuate.

The Fund maintains an investment and taxation reserve of \$9,790,741 (2020:\$2,534,081) which is accrued by estimating tax obligations that arise from operating and investing activities and is used to fund tax liabilities as they arise.

The Fund maintains an insurance reserve that represents the profits from premium rebate received under the Fund's group insurance policies. It is established to ensure that any such profits are used in accordance with the Insurance in Superannuation Voluntary Code of Practice which the Fund has adopted, by which the reserve may only be used to meet insurance premium costs (being any costs that the Fund would be entitled to charge to members as insurance premiums). As at report date the insurance reserve was \$1,903,791 (2020: \$2,326,135).

15. Segment information

The Fund operates solely in one reportable business segment, being the provision of superannuation benefits to members. The Fund also operates from one reportable geographic segment, being Australia, from where its activities are managed. Revenue is derived from interest, dividends, gains on the sale of investments and unrealised changes in the value of investments. Whilst the Fund operates from Australia only, the Fund has investment exposures in different countries and across different industries.

16. Related party disclosures

(a) Trustee and key management personnel

The Trustee of Christian Super is Christian Super Pty Limited (ACN 065 040 619).
The directors and the following executives are considered the key management personnel.
The key management personnel of the Trustee company, who held office during part or all of the year are:

Employer Representatives	Member Representatives	Independent Representative
Neville Cox (Chair) Yvonne Boswarva Ruth Limkin Elizabeth Klein	Graeme Janes Lily Ng Craig Kellock Michael Anderson	John Peberdy (resigned 23/6/21)

Other key management personnel of the Fund are:

Ross Piper - Chief Executive Officer
Tim Macready - Chief Investment Officer (resigned 16/10/20)
Mark Rider - Chief Investment Officer (appointed 3/8/20)
Nathan Buttigieg - Chief Operations and Product Officer
Jeremy Wynn-Jones - Head of Governance, Risk & Compliance
Alex Mok - Head of Finance
Astrid Dare - Chief Member Experience Officer

The RSE licence was granted on 14 February 2006 (Licence no L0000918).

(b) Compensation of key management personnel

	2021	2020
	\$	\$
Short-term employee benefits (salaries, director fees)	1,808,766	1,332,807
Post-employment benefits (superannuation)	78,196	151,104
Total Compensation	1,886,962	1,483,911

(c) Related party transactions

During the year, the following transactions occurred between the Fund and its related parties:

Directors Transactions

Payments made to the employers of directors as a reimbursement for services provided by the directors.

Key management personnel and directors' financial interests

Certain key management personnel and directors are members of the Fund. Their membership has been entered into under terms and conditions no more favourable than those the Fund would have adopted if dealing with an at arm's length member.

Brightlight Group

Christian Super Pty Limited as Trustee for Christian Super holds the shares in Brightlight Impact Holdings Pty Ltd in its capacity as trustee, and as an investment asset, of the Fund. Brightlight Group Pty Ltd is a wholly owned subsidiary of Brightlight Impact Holdings Pty Ltd.

Other related party transactions

During the year, in accordance with the signed investment consultancy agreement, the Fund has paid \$479,050 (2020: \$415,871) to Brightlight Group Pty Ltd. The Fund also paid \$21,729 to Brightlight Group Pty Ltd regarding Support service agreement.

The Fund has charged Brightlight Group Pty Ltd management fees relating to the front offices of \$61,697 (2020: \$68,857).

CHRISTIAN SUPER

Notes to the Financial Statements
For the year ended 30 June 2021

17. Financial risk management objectives and policies

The Trustee's robust risk management framework continues to be applied across the Fund's operations and the Trustee continues to monitor the impact of COVID-19 on the Fund's risk profile. Non-financial risks from global and domestic movement restrictions and any remote working by our staff, counterparties, clients and suppliers, are being identified, assessed, managed and governed through timely application of the Trustee's risk management framework.

The Fund's financial instruments principally comprise units in collective investment vehicles and directly held securities managed under mandates. The main purpose of these financial instruments is to generate a return on investment. The Trustee has determined that investing via these types of instruments is appropriate for the Fund.

The Trustee has a policy that is applied when approved investment managers trade in derivatives. Investment managers (other than the asset overlay manager) are permitted to use derivatives for hedging purposes only but not as a core investment asset. Derivatives used by investment managers are monitored by the Trustee to reflect policy.

The Fund's investing activities expose it to the following risks from its use of financial instruments:

- Market risk (which includes currency risk, interest rate risk and price risk)
- Credit risk
- Liquidity risk.

These risks are described more fully on the following pages. Set out below is a general description of how investment risk is managed by the Trustee.

Risk management structure

The Trustee acknowledges that an integral part of its good governance practice is a sound and prudent risk management framework. The Fund maintains a documented Risk Management Framework which is subject to regular review both by management and the Board.

The Board of Directors of the Trustee has overall responsibility for the establishment and oversight of the Fund's Risk Management Framework. The Trustee's Audit, Risk & Compliance Committee oversee how management monitors compliance with the Fund's risk management policies and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund. The Trustee's risk management policies are established to identify and analyse the risks faced by the Fund (including investment risks managed by the Fund's Investment Committee), to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities.

The allocation of the investments of the Fund to the various types of asset classes is determined by the Fund's Investment Committee in consultation with its appointed investment consultant - JANA. Once allocated, they are invested in accordance with the Fund's published investment strategies for the various investment options available to members.

The Board's Investment Committee consists of selected Board Members with appropriate investment experience. The Investment Committee is responsible for developing and monitoring the Fund's risk management policies related to investment activities. This includes oversight of the allocation of investments to fund managers, evaluating their performance and providing recommendations to the Trustee which has ultimate responsibility for the oversight of investment strategy.

An external investment consultant is appointed to provide expert advice to the Trustee regarding the management of the Fund's investment portfolio in accordance with the various investment strategies for the Fund's various investment options. The Trustee, in consultation with the appointed investment consultant, undertakes extensive due diligence to ensure the appointed fund managers have the requisite skills and expertise. Investments are monitored on a weekly basis through evaluation of prevailing market conditions and benchmark analysis.

The Investment Committee receives quarterly reports from the Fund's Chief Investment Officer and in turn advises quarterly to the Board of Directors of the Trustee on its activities. Divergence from target asset allocations and the composition of the portfolio is monitored by the Fund's Chief Investment Officer on a weekly basis. Reports from the Fund's Chief Investment Officer include the following:

- details of the controls in place to monitor compliance with the Fund's various investment strategies;
- current asset allocations against target positions;
- investment performance against benchmarks; and
- fund manager compliance reporting.

Excessive risk concentration

Concentration indicates the relative sensitivity of the Fund's performance to developments affecting a particular industry or geographical location. Concentrations of risk arise when a number of financial instruments or contracts are entered into with the same counterparty, or where a number of counterparties are engaged in similar business activities, or activities in the same geographic region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions.

In order to avoid excessive concentration of risk, the Fund's policies and procedures include specific guidelines to focus on maintaining a diversified portfolio. The Fund does not have any significant exposure to any individual counterparty or industry. Its assets are invested by individual investment managers.

17. Financial risk management objectives and policies (continued)

Risk Management Structure (continued)

Market risk

Market risk represents the risk that the fair value or future cash flows of a financial instrument will fluctuate as a result of changes in market prices, whether those changes are caused by factors specific to the individual instrument (or its issuer) or factors affecting all instruments in the market. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk. The objective of market risk management is to manage and control market risk exposure within acceptable parameters, while optimising the return on risk.

Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

The Fund has exposure to currency risk through its investments in Australian domiciled registered funds that invest in international cash and short term deposits, other interest bearing securities, listed equities, unit trusts, and derivatives. The Trustee's strategy for managing currency risk in respect of these exposures includes the appointment of a specialist foreign currency manager who manages a portfolio of currency exposures (i.e. "a currency overlay"), designed to partially hedge the changes in the market values of those funds' investments arising from foreign currency movements. The Fund's currency overlay comprises forward foreign exchange contracts across a range of currencies.

Foreign exchange summary

The Fund's direct exposure to foreign currency exchange rates at 30 June was as follows:

2021

AUD equivalents

Assets	US Dollars	Euro	Japanese Yen	British Pound	Other Currencies	Total

CHRISTIAN SUPER
Notes to the Financial Statements
For the year ended 30 June 2021

17. Financial risk management objectives and policies (continued)

Currency risk (continued)

Sensitivity analysis - Currency risk

In accordance with industry practice, the Fund considers a 20% movement in the Australian Dollar (depending on the foreign currency) reasonably possible for the 2020/21 or subsequent reporting period. This analysis is performed on the same basis for the prior year and is not guaranteed.

A strengthening/weakening of the AUD to the extent indicated against the currencies listed below at 30 June would have increased/(decreased) the profit before income tax and the net assets available to pay benefits by the amounts shown.

Note that the analysis does not take into account the impact of movements in exchange rates on the value of foreign currency assets held in Australian denominated collective investment vehicles. The potential effects of such movements is included in the sensitivity analysis under "other price risk".

Effects in AUD

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in the market interest rates.

The majority of the Fund's financial instruments are non-interest bearing with only cash and cash equivalents, short-term deposits and interest bearing securities being directly subject to interest rate risk. As a result, the Fund is subject to limited direct exposure to interest rate fluctuations in prevailing levels of market interest rates. The Fund is indirectly exposed to fluctuations in market interest rates through its investments in collective investment vehicles, which invest in a variety of short and long term interest bearing securities.

The interest rate risk disclosures have not been prepared on a look through basis for investments held indirectly through collective investment vehicles. Consequently, the disclosure of interest rate risk in this note does not represent a comprehensive interest rate risk profile of the Fund.

The Fund's interest rate risk is monitored on a weekly basis by the Fund's investment consultant in accordance with the policies and procedures in place including monitoring of exposure to interest rates and assessment of actual interest rates against the relevant benchmarks. The internal investment team also has the authority to transfer excess cash to short-term deposits.

CHRISTIAN SUPER

Notes to the Financial Statements
For the year ended 30 June 2021

17. Financial risk management objectives and policies (continued)

Interest rate risk (continued)

Currently, cash at bank and on deposit is held with Westpac Bank and National Australia Bank which have an AA rating as reported by Moody's. The ratings of these banking institutions are reviewed by the Chief Investment Officer on a regular basis. Any change in transactional banking arrangements requires the approval of the Trustee Board.

At the reporting date the profile of the Fund's interest bearing financial instruments was:

30 June 2021	AAA to AA- \$	A+ to A- \$	BBB+ to C \$	Non Rated \$	Total \$
Assets					
Cash and cash equivalents	13,608,175	-	-	-	13,608,175
Investments					
Cash and short term deposits	88,295,167	-	24,107,298	8,299,239	120,701,704
Other interest bearing securities	72,453,395	71,625,090	138,592,698	58,152,375	340,823,558
	<u>174,356,737</u>	<u>71,625,090</u>	<u>162,699,996</u>	<u>66,451,614</u>	<u>475,133,437</u>

30 June 2020	AAA to AA- \$	A+ to A- \$	BBB+ to C \$	Non Rated \$	Total \$
Assets					
Cash and cash equivalents	7,427,401	-	-	-	7,427,401

Sensitivity analysis - Interest rate risk

Following analysis of historical data over the past 5 years and expected interest rate movement during the 2021 financial year together with consultation with the investment consultant, the Fund anticipates a 100 basis point movement in interest rates is reasonably possible for the 2020/21 reporting period. This analysis assumes that all other variables, in particular foreign currency rates, remain constant and all interest rates are variable. The analysis is performed on the same basis for the prior year and is not guaranteed.

An increase/decrease of 25 basis points (FY2020: 25 basis points) in interest rates at the reporting date would have increased/decreased the change in net assets available to pay member liabilities and the income statement by the amounts below.

	Carrying Amount	Income Statement		Net assets available to pay member liabilities	
		-25bps	+25bps	-25bps	+25bps
30 June 2021					
Cash	120,209,387	(300,523)	300,523	(300,523)	300,523
Other interest bearing securities	354,924,050	(887,310)	887,310	(887,310)	887,310
	<u>475,133,437</u>	<u>(1,187,834)</u>	<u>1,187,834</u>	<u>(1,187,834)</u>	<u>1,187,834</u>
		-25bps	+25bps	-25bps	+25bps
30 June 2020					
Cash	136,442,784	(341,107)	341,107	(341,107)	341,107
Other interest bearing securities	300,871,687	(752,179)	752,179	(752,179)	752,179
	<u>437,314,471</u>	<u>(1,093,286)</u>	<u>1,093,286</u>	<u>(1,093,286)</u>	<u>1,093,286</u>

Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will cause a loss to the other party by failing to discharge an obligation. The Fund has a credit policy in place and the exposure to credit risk is monitored on an ongoing basis by the Fund's investment consultant. The credit policy provides guidelines as to the appropriate terms and conditions of transactions entered into and the escalation procedures to follow when the recovery of assets is considered doubtful.

The carrying amounts of financial assets best represent the maximum credit risk exposure at the reporting date. No collateral is held as security nor do other credit enhancements exist for financial assets held. No financial assets are considered past due as all payments are considered recoverable when contractually due.

For direct fixed income and cash investments, credit risk is mitigated through maintaining a strict mandate of investing in investment-grade credit only. In addition, potential direct credit investments are analysed by the Investment Research Analyst, evaluated by the Senior Investment Analyst and authorised by the internal investment team, before being considered for investment.

17. Financial risk management objectives and policies (continued)

Credit Risk (continued)

The Fund has also adopted the policy of spreading direct fixed income and cash investments amongst approved counterparties with appropriate credit qualities, as a means of mitigating the risk of financial loss.

Credit exposure positions are evaluated on an ongoing basis in regard to the financial strength and quality of underlying corporate and government securities. The Fund has no direct exposure to subprime securities. A review of the direct fixed income and cash investment mandates is carried out annually including mandates associated with credit risk.

Credit risk arising from collective investments through appointed fund managers is mitigated through extensive due diligence prior to a manager's appointment and benchmark analysis on existing fund managers' investments on a monthly basis.

Credit risk arising from direct investments is mitigated through the Trustee's formal due diligence process prior to the investment decision. A risk assessment framework is part of this due diligence process. The risk assessment framework involves consideration of both the likelihood of the risk event occurring and the impact of the identified risk on the Trustee if the event occurred.

Credit risk associated with receivables is considered low, as there is usually a short settlement period.

All of the investments and derivatives of the Fund are held through the custodian, State Street Australia Limited. The Fund monitors its risk by monitoring the credit quality and financial position as reported by the custodian.

Other market price risk

changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

As all of the Fund's financial instruments are carried at fair value with changes recognised in the income statement, changes in market conditions affecting fair value will be recognised in the Income statement. As the investments of the Fund (other than cash held for liquidity purposes) comprise a combination of directly held securities and units in collective investment vehicles, the Fund's exposure to other market risk is therefore limited to the market price movement of these investments. The Fund's exposure at year end to other market price is detailed below.

Sensitivity Analysis - Other market price risk

reasonably possible for the 2021 financial year:

Australian equities	+ / - 20%
International equities	+ / - 20%
Units in unit trusts	+ / - 20%

The increase/decrease in the market price against the investments of the Fund at 30 June would have increased/(decreased) the profit/(loss) before tax by the amounts shown below. The analysis assumes that all other variables, in particular, interest rates and foreign exchange rates remain constant. The analysis is performed on the same basis for the prior year and is not guaranteed.

		Income Statement

For the year ended 30 June 2021

17. Financial risk management objectives and policies (continued)

Liquidity risk

Liquidity risk is the risk that the Fund will not be able to meet its financial obligations as and when they fall due. The Fund's approach to managing liquidity is to ensure, as far as possible that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation. The Fund has developed a Cash Flow and Liquidity Policy and an Adequacy of Resources Statement that covers cash flow management, solvency and both statutory and practical liquidity requirements for the Fund.

This policy prescribes the projection of liquidity requirements to meet anticipated withdrawals from the Fund on a quarterly basis (i.e. at least 1.0 times cover). As at reporting date, liquid or quick assets (cash, deposits, and fixed interest bonds) represented 6.5 times (2020: 16.10 times) total liabilities.

The Fund's Trust Deed and Product Disclosure Statement provide for the daily withdrawal of benefits and it is therefore exposed to the liquidity risk of meeting members' withdrawals at any time.

The Fund's liquidity risk is managed on a weekly basis by the internal investment team in accordance with policies and procedures in place and the Fund's investment strategy. The Fund's overall liquidity risks are monitored on a monthly basis by the Trustee.

The following table shows the contractual maturities of financial liabilities, including interest payments and excluding the impact of netting agreements.

	Carrying Amount	Contractual Cash Flows	Less Than 1 Month	1 to 3 Months
30 June 2021				
Payables	7,401,643	7,401,643	7,401,643	-
Member liabilities	1,974,455,746	1,974,455,746	1,974,455,746	-
Derivative liabilities	19,017,523	19,017,523	-	19,017,523
	<u>2,000,874,912</u>	<u>2,000,874,912</u>	<u>1,981,857,389</u>	<u>19,017,523</u>
30 June 2020				
Payables	4,857,038	4,857,038	4,857,038	-
Member liabilities	1,643,738,972	1,643,738,972	1,643,738,972	-
Derivative liabilities	5,562,916	5,562,916	-	5,562,916
	<u>1,654,158,926</u>	<u>1,654,158,926</u>	<u>1,648,596,010</u>	<u>5,562,916</u>

Member liabilities have been included in the less than one month column, as this is the amount that the Fund could be required to pay in members' benefits, however, members may not necessarily call upon amounts due to them during this time.

18. Insurance

The Fund provides death, disability and income protection benefits to members. These benefits are greater than the members' vested benefits. The Trustee has taken out insurance to cover that part of members' benefits in excess of vested benefits.

19. Subsidiary

Name of Entity	Country of Incorporation	2021 Ownership interest	2020 Ownership interest
Brightlight Group	Australia	68%	100%

During the year, BIH issued Class B shares to its employees and issued Preference shares to an external party with amounts fully paid.

The Fund has adopted AASB 2013-5 "Amendments to Australian Accounting Standards - Investment Entities". As a result, the Fund does not consolidate its subsidiary, the Brightlight Group; however, it is required to provide certain disclosures, as outlined above.

21. Early release payments

COVID 19 was declared a world wide pandemic by the World Health Organisation in March 2020. COVID 19, despite measures to slow the spread of the virus, has since had a significant impact on global economies and equity, debt and commodity markets. On 22 March 2020 the federal government announced a temporary measure due to the effects of coronavirus on the economy. This new rule allowed individuals to access up to \$10,000 of their superannuation in 2019/20 and a further \$10,000 in 2020/21. For the year ended 30 June 2021 the Fund paid out 1436 (2020: 1,406) COVID-19 claims totalling \$11,235,853, (2020: \$11,041,039 in benefits to members seeking early access to their super.

22. ESG and Climate risk

Environmental, social and governance (ESG) risk is the risk that non-financial matters related to the natural environment, people, and company governance can have a material financial impact on a company's operating performance. Examples of these risks include Climate Change, Modern Slavery and Board Diversity. The Fund has a range of ESG policies in place to manage such risks, including a negative screening policy, an ESG integration policy, a corporate engagement policy, as well as an impact investing policy. The Fund is also a member of various accrediting bodies such as the UN-supported Principles for Responsible Investment (PRI) and the Responsible Investment Association Australasia (RIAA), who develop and ensure best practise of ESG risk management amongst its members.

In regard to Climate Change, the Trustee ensures that the Fund's exposure is limited to industries most susceptible to transition risk, partner with investment managers who are able to integrate various risks associated with Climate Change into investment decision making, engage industry on taking necessary steps toward addressing Climate Change, both unilaterally and collaboratively through initiatives such as Climate Action 100+, and commit a portion of our investments to businesses and technologies that will thrive in a low-carbon economy.

23. Significant events after balance date

Since 30 June 2021 there have been no other matters or circumstances which have arisen that have significantly affected or may significantly affect the financial position or operating results of the Fund.

**CHRISTIAN SUPER
FINANCIAL STATEMENTS
FOR THE YEAR ENDED 30 JUNE 2021
TRUSTEE DECLARATION**

In the opinion of the Trustee of the Fund:

- (i) The accompanying financial statements are drawn up so as to present fairly the financial position of the Fund as at 30 June 2021 and the results of its operations and cash flows for the year then ended; and
- (ii) The operation of the Fund has been carried out in accordance with its Trust Deed, as amended and in compliance with the requirements of the Superannuation Industry (Supervision) Act 1993 and Regulations and the Corporations Act 2001 and Regulations and Guidelines, during the year ended 30 June 2021; and
- (iii) The financial statements have been prepared in accordance with Accounting Standards, other mandatory professional reporting requirements and the provisions of the Trust Deed, as amended.

Signed in accordance with a resolution of the Board of Directors of Christian Super Pty Limited (ACN 065 040 619).

Signed at Sydney this 23rd day of September 2021

Part 1 - Independent Auditor's report on financial statements

For a Reporting Entity

Independent Auditor's report approved form for an RSE that is a reporting entity

Christian Super (ABN 66 628 776 348)

Report by the RSE Auditor to the trustee

Opinion

I have audited the financial statements of Christian Super for the year ended 30 June 2021 comprising the statement of financial position, income statement, statement of changes in member benefits, statement of cash flows and statement of changes in equity/reserves.

In my opinion, the financial statements present fairly, in all material respects, in accordance with Australian Accounting Standards the financial position of Christian Super as at 30 June 2021 and the results of its operations, cash flows, changes in equity/reserves and changes in members' benefits for the year ended 30 June 2021.

Responsibilities of the trustee for the Financial Statements

The RSE's trustee is responsible for the preparation and fair presentation of the financial statements in accordance with Australian Accounting Standards and the requirements of the *Superannuation Industry (Supervision) Act 1993* (SIS Act) and the *Superannuation Industry (Supervision) Regulations 1994* (SIS Regulations). The trustee is also responsible for such internal control as the trustee determines is necessary to enable the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the trustee is responsible for assessing the ability of the RSE to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the trustee either intends to liquidate the RSE or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

My objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Australian Auditing Standards, I exercised professional judgment and maintained professional scepticism throughout the audit. I also:

- identified and assessed the risks of material misstatement of the financial statements, whether due to fraud or error, designed and performed audit procedures responsive to those

**Building a better
working world**

risks, and obtained audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- obtained an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the RSE's internal control.
- evaluated the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the trustee.
- concluded on the appropriateness of the trustee's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the RSE's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify my auditor opinion. My conclusions are based on the audit evidence obtained up to the date of my audit report. However, future events or conditions may cause the RSE to cease to continue as a going concern.
- evaluated the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- communicated with the trustee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identified during my audit.
